**SECTION A: READING (20 MARKS)**

**Q.1: Read the passage given below and answer the questions that follow. (1x8=8)**

1. Many people like to eat pizza, but not everyone knows how to make it. Making the perfect pizza can be complicated, but there are lots of ways for you to make a more basic version at home.
2. When you make pizza, you must begin with the crust. The crust can be hard to make. If you want to make the crust yourself, you will have to make the dough using flour, water and yeast. You will have to knead the dough with your hands. If you do not have enough time to do this, you can use a prepared crust that you buy from the store.
3. After you have chosen your crust, you must add the sauce. Making your own sauce from scratch can take a long time. You have to buy tomatoes, peel them and then cook them with spices. If this sounds like too much work, you can also purchase jarred sauce from the store. Many jarred sauces taste almost as good as the kind you make at home.
4. Now that you have your crust and your sauce, you need to add the cheese. Cheese comes from milk, which comes from cows. Do you have a cow in your backyard? Do you know how to milk the cow? Do you know how to turn that milk into cheese? If not, you might want to buy cheese from the grocery store instead of making it yourself. When you have the crust, sauce, cheese ready, you can add other toppings. Some people like to put meat on their pizza, while other people like to add vegetables. Some people even like to add pineapple! The best part of making pizza at home is that you can customise it by adding your own favourite ingredients.

- a) What are the ingredients required to make a crust?
- b) How can you prepare sauce?
- c) What can be done if you don't have time to prepare dough?
- d) Where does cheese come from?
- e) What are the toppings to be added on pizza?
- f) What is the best part in making pizza at home?
- g) Give a suitable title for the passage.
- h) Find the words from the passage which mean the following:
  - i) start (Para 2)
  - ii) to mix (Para 2)

**2. Read the following passage and answer the questions.**

**(12 Marks)**

1. Coconut tree grows in abundance in the coastal areas and in sandy soils. It thrives even in the poorest soils. The tree may grow upto 100 feet tall and may survive for about a century. When the tree is about 7 years old it starts flowering month after month.
2. Coconut has an important place in the cultural life of India. It is known as KalpaVriksha, the tree of heavens, since it provides food, drink, shelter and other essentials of life. For people in hot regions, it is considered auspicious. It is offered in worship, marriages and other ceremonial occasions.
3. The fruit contains water and kernel inside. Its outer hard shell is enclosed in a fibrous covering. The water in the tender coconut is highly nutritious and has medicinal properties. It helps to keep down the heat of the body. Being a delicious drink, it quenches the thirst on summer days. It contains glucose and minerals like potassium and sodium. Hence, it gives energy to the body. It is given even to a month old baby since it is easily digestible.
4. Tender coconut water has electrolytic contents. Therefore, it can be used in cases of less urination, dropsy, for promoting free passage of urine and in dehydration due to diarrhoea. It can also be given in irritable colon conditions like diarrhea, dysentery, colitis etc. It can be used in cases of hyperacidity.
5. The coconut water stops nausea and vomiting. It is a good remedy for cholera since it supplies potassium lost in vomiting and diarrhea. It is given in cases of infectious fever as it increases urinary output and also eliminates toxins.
6. As the coconut passes from tender stage to younger stage the liquid inside forms a jelly-like substance generally called 'Spoon Coconut'. Being delicious and easily digestible it can be

given to infants, old and sick people. It contains oil, carbohydrates and proteins which do not rot in the intestines and therefore it is considered a better proteinous food than others. Moreover, it does not add any toxic substance to the system. This fleshy layer can be applied to wounds also in view of its healing properties.

7. The ripened coconut contains oil which acts as a laxative and also as a germicide. The milk from its kernel is rich in protein and can be given in cases of protein deficiency in moderate quantities. It is a good remedy for acidity because the oil content in it suppresses the secretion of acids in the stomach. It also helps to relieve dry cough and chest pain.
8. Coconut forms almost an essential ingredient of the food preparations in south and coastal regions of India. Coconut scrapings are used in the preparation of curries, chutneys and sweets. Coconut milk is used in sweet desserts and coconut oil is used in baking recipes, for frying, for greasing baking pans and as a replacement for butter or vegetable oil in recipes. Children relish chewing it with jaggery which is actually good for the health of their gums and teeth. The use of coconut strengthens and rejuvenates the system.

सामान्य निर्देश :-

1. इस प्रश्न पत्र में कुल चार खण्ड क, ख, ग, एवं घ हैं ।
2. निर्देशानुसार सभी प्रश्न हल करना अनिवार्य है ।
3. यथासंभव प्रत्येक खण्ड के उत्तर क्रमशः लिखिए ।

(खण्ड - 'क')

प्रश्न 1. निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गए प्रश्नों के उत्तर लिखिए - 8

किसी भी कार्य की सफलता के लिए ध्येय के प्रति उत्कट लगन, कार्य में अटूट श्रद्धा एवं अपनी शक्तियों में पर्याप्त विश्वास आवश्यक है । विश्वास, एकाग्रता, लगन, संतुलन, श्रद्धा आदि साहस के ऊपर निर्भर है, क्योंकि मनुष्य का सबसे प्रथम गुण साहस है । साहस अन्य सब गुणों का प्रतिनिधित्व करता है । यदि तन, मन और वाणी सशक्त हों तो उनके द्वारा प्राप्त कार्य शक्ति के आगे भाग्य स्वयं नतमस्तक हो जाता है । साहसी की प्रतिभा के सामने शोक और भय भाग जाते हैं । साहसी को संसार भी रास्ता देता है । मनुष्य में सब गुण हों, वह विद्वान हो, धनवान हो, शक्तिशाली हो, पर यदि उसमें साहस न हो तो वह अपने सद्गुणों, योग्यताओं व शक्तियों का उपयोग नहीं कर सकता । साहस मनुष्य के व्यक्तित्व का नायक है । साहस व्यक्ति को निर्भय बनाता है और जहाँ निर्भयता होती है वहाँ सफलता निश्चित है । निर्भयता से ही आत्मविश्वास जागृत होता है । आत्मविश्वास के

अभाव में हम उस प्रत्येक कार्य को करते हुए डरेंगे जो हमने पहले नहीं किया और जो बिल्कुल नया है । जिनके संकल्प अधूरे होते हैं, जो संशय-ग्रस्त होते हैं, वे कोई बड़ा काम नहीं कर पाते और कुछ करते भी हैं तो उनमें असफल हो जाते हैं ।

- I. कार्य की सफलता के लिए क्या आवश्यक है ? 2
  - II. भाग्य किसके समक्ष नतमस्तक हो जाता है ? 2
  - III. मनुष्य अपने सद्गुणों, योग्यताओं तथा शक्तियों का उपयोग कब नहीं कर पाता है? 2
